Ray, I have a correction to make on the information sent to you on the 1st of October. After investigating these coordinates further we discovered that the location given you for the Schrade well were wrong. The correct location should be: 28.85973N -97.3.4468W. The location of the church well given you is correct at 28.85789N -97.34516W. The other well at the church that we call the picnic area well is located at 28.85767N -97.34663W. Sorry for the wrong information on the Schrade well earlier.
Barbara
